

## PAX Unveils its Powerful Solutions at RETAILTECH Japan

(Hong Kong, PRC, 12<sup>th</sup> March 2019) **PAX Global Technology Limited** (“PAX” or the “Company” or the “Group”, HKSE stock code: 00327.HK), one of the world’s leading providers of electronic payment terminals (“E-Payment Terminals”) solutions and related services, has recently unveiled a full range of payment terminals at RetailTech Japan, the largest and most influential trade fair in the retail information system industry in Japan.

Following the launch of the mobile Linux terminal S920 in the Japanese market the last year, PAX has brought even wider product portfolio to the event this year, which included the innovative Android-based SmartPOS terminals A-series, the SmartECR integrated payment tablets E-series, and the IM-series of unattended self-service payment modules.

**Ms Heidi Hoo, General Manager for Asia Pacific at PAX** stated, “As Tokyo Olympic Games are approaching, Japanese government is making earnest efforts to promote cashless payments. This is driving higher demand of Japanese merchants to install modern cashless acceptance solutions which are fully certified to international payment acceptance standards. PAX is delighted to be helping Japanese acquirers and retailers transform and upgrade their payment and management platforms to meet this challenge.”

As elsewhere around the world, our revolutionary SmartPOS A920 and SmartECR E500 & E800 attracted most customer interest at the RetailTech show this year. The compact, stylish design, superior performance and ability to deliver a rich set of value-added applications and services are highly appreciated.

Different from other traditional types of point of sale terminals, PAX’s A-series, E-series and IM-series devices deliver flexibility by enabling merchants to download modern management and analytic applications on the open PAXSTORE platform, which offer retail businesses access to innovative in-store solutions.
