

PAX's IM30 Android Unattended Payment Terminal Will Revolutionize Consumer Self-Service Transactions

(Hong Kong, PRC, 2nd September 2019) **PAX Global Technology Limited** (HKSE stock code: 00327.HK), a leading international supplier of secure electronic payment terminal solutions, announced the launch of the IM30, a new generation Android-based all-in-one unattended payment solution.

Designed and developed by C2P Convenient to Payments GmbH (C2P), a joint venture of PAX and CCV, the IM30 delivers a modern smartphone-like user interface with full PIN-on-Glass and payments functionality. The compact and ruggedized design is suitable for a variety of indoor and outdoor self-service scenarios.

The IM30 is equipped with advanced automatic customer detection sensor technology which guarantees low-energy consumption, while supporting traditional and alternative payment methods including EMV Chip & PIN, NFC contactless, magnetic stripe, as well as handling QR code payments and barcode scanning via an integrated camera. The perfect combination of beacon technology and the Android-based platform allows businesses to create tailored sales and marketing campaigns that are more engaging and profitable, delivering a seamless customer experience without any staff present at the point of sale.

Useful business-boosting applications can be downloaded directly into the IM30 through PAXSTORE, the payment industry's most popular software distribution marketplace and advanced terminal management system, enabling administrators to manage their hardware estates more efficiently, provide remote help desk support, instantly track and monitor data in real-time.

Another innovation which speeds up time-to-market, saves costs and removes any integration friction, is the fact that once the IM30 is set up, it runs unattended thereafter, anywhere in the world.

Alex Dong, VP of R&D at PAX, said, "The collaboration with CCV enabled PAX to design a payment solution for tomorrow's modern unattended world. Built to be water, wind and shock resistant, the IM30 can withstand pretty much any kind of harsh outdoor environment."

Andrew Wu, Vice President at PAX, added, "Like our wider Android terminal and Smart Kiosk portfolio, the IM30 offers a stylish, intuitive and engaging communication interface that can support any transactional need."
